

TABLE OF CONTENTS

Chapter 1: Introduction to Slope of a Curved Line	1
Chapter 2: First Principles	26
Chapter 3: Graphing Polynomials	78
Chapter 4: Limits	119
Chapter 5: Implicit Differentiation	158
Chapter 6: Maximum/Minimum Problems	171
Chapter 7: Position, Velocity, Acceleration	191
Chapter 8: Related Rates	218
Chapter 9: Trigonometry	249
Chapter 10: Logarithms and Exponential Functions	279
Chapter 11: Linear Tangent Approximations and Euler's Method	317

Chapter 12: Integration	326
Chapter 13: Definite Integrals	337
Chapter 14: Position, Velocity, Acceleration II	384
Chapter 15: Differential Equations	402
Chapter 16: Volumes of Solids of Revolution	442
Chapter 17: Further Integration Techniques	470
